# CHROMagar™ Salmonella Plus

Intense contrast colour

Conform to ISO 6579:2003 requirements

SPECIES	COLONY COLOUR	SPECIFICITY & SENSITIVITY
<i>Salmonella</i> including <i>S.Typhi</i> & <i>S.Paratyphi</i>	<b>Mauve</b>	<b>99 %</b>
<i>Salmonella</i> lactose plus	<b>Mauve</b>	---
<i>E.coli</i>	<b>Colourless</b>	---
<i>Other coliforms</i>	<b>Turquoise blue</b>	---

➔ In addition to the standard detection of *Salmonella* spp the recent revision of **ISO 6579:2003** norm now requires the detection of all *Salmonella* spp including *Salmonella* Typhi, *Salmonella* Paratyphi and lactose positive *Salmonella*

➔ Powerful and easy detection of *Salmonella* in polymicrobial specimens enhanced by a formulation that allows an **optimal contrast colour** between *Salmonella* and other enteric bacteria.
