CHROMagar™ Candida

Rapid and Powerful **Colour Differentiation**
Easy Detection of **Mixed Yeast Cultures**

SPECIES	COLONY COLOUR	SPECIFICITY & SENSITIVITY
<i>Candida albicans</i>	Green	Exceeds 99 % *
<i>Candida tropicalis</i>	Metallic blue	Exceeds 99 % *
<i>Candida krusei</i>	Pink velvet	Exceeds 99 % *

(*) Odds and Bernaerts 1994

➔ In addition to the standard detection of ***C.albicans***, the detection of ***C.tropicalis*** and ***C.krusei***, which tend to be more resistant to antifungal agents, is important to optimize **antifungal treatment** especially for immunocompromised patients.

➔ Powerful and easy detection of **mixed yeast cultures** is particularly useful to detect **antifungal resistant strains** even present in the sample as a **minor population**.
