The carousel filler with the removable rack for safe and effortless dish loading ▶

- Fast and reliable operation
- Smooth perfect agar due to the double headed pump design
- Minimal down-time with the removable racks
- Easy operation with a friendly color touch screen
- Safe and effortless dish loading and unloading

PetriSwiss PS200 automatically fills and stacks dishes in removable safety racks. This unique, removable rack principle allows racks to be pre-filled and loaded onto the rack disk at any time. The dishes can remain stored in the rack, in a safe and stable stand. The unit down time for a refill is minimal!
